

iGUIDE[®] Instant Sketch

Process claims **quickly** and **efficiently**, like never before.

Claims adjusters and restoration professionals can now simplify their documentation process. iGUIDE technology can automatically create room(s) or entire floor plan drawings and translate those directly to an ESX sketch within the Xactimate software platform in minutes.

Using optical imaging, laser (Lidar) measurements and deep learning AI technology, iGUIDE Instant Sketch* provides users a vital tool to quickly, consistently and comprehensively document interior losses.

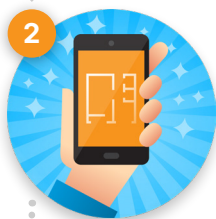

90%+

Decrease in time spent gathering data and sketching

How iGUIDE Instant Sketch works:

The iGUIDE PLANIX Camera System photo documents and measures the property loss.

Advanced AI translates the data in real-time to create an AI-drafted virtual walkthrough and accurate floor plan sketch.

iGUIDE connects to Verisk Xactimate to create an iGUIDE Instant Sketch.

With the ESX file imported, begin estimating in Xactimate within minutes.

By utilizing iGUIDE Instant Sketch you can expect:

Improved accuracy

1,000's of measurements instantly.

A faster rate of capture

Measure properties in minutes, not hours.

Thorough documentation

Virtual walk-throughs and real-time tagging features.

Enhanced workflow

A seamless and high-speed process that reduces time spent on data collection and sketching by 90% or more.

Time savings

Create comprehensive claims estimates in Xactimate within minutes using the AI-generated floor plan sketch.

Increased revenue

Document more claims daily with the fast capture and process system.

*Please note that iGUIDE Instant Sketch is currently in BETA. The machine-generated sketch quality relies on the input data the camera operator provides. Although iGUIDE and Verisk aim for typical file delivery in Xactimate within minutes, this timeframe may vary depending on load factors, such as after a catastrophic loss event.

About us

Founded in 2013, in Kitchener, Ontario, Canada, Planitar Inc. is the maker of iGUIDE, a proprietary camera and software platform for capturing and delivering immersive 3D virtual walkthroughs and extensive property data.

Why iGUIDE

iGUIDE is the most efficient system to map interior spaces and features accurate floor plans, measurements and reliable property square footage. By integrating floor plans and visual data, iGUIDE provides an intuitive and practical way to digitally navigate and explore built environments.
