⊡iGUIDE® **Add-ons**

iGUIDE add-ons must accompany an iGUIDE Virtual Walkthrough or CAD product. They are intended to be a head start rather than a finished set of drawings. They are perfect solution for those who wish to fast track measurement, drawing, modelling and create their own drawings.

RVT Add-on

A detailed 3D Model (RVT) and 2D CAD File (DWG) are delivered, with the option to add a reflected ceiling plan, alongside a Premium immersive virtual walkthrough which includes tags and digital measurement tools.

Reflected Ceiling Plan Add-on

Reflected Ceiling Plans (RCPs) are architectural drawings that show a space's ceiling layout. Unlike typical floor plans, which depict walls, doors, and windows, RCPs focus solely on the ceiling elements and are mirrored to match the floor plan. This add-on is optionally available with all the previously mentioned products.
