The iGUIDE® PORTAL

Easily manage and maintain your iGUIDE project data

Introducing the iGUIDE Portal

The iGUIDE Portal is an online software interface used for submitting and managing iGUIDE project data before and after processing. iGUIDE project data can be interpreted into various deliverables, ranging from simple to complex. The processing time and type will vary by the selected package or add-on and the portal type. To be usable, all property data must pass through one of the iGUIDE Portal solutions.

Planitar offers three distinct iGUIDE Portal solutions:

1. Essentials Portal (manage.youriguide.com)

The iGUIDE Essentials Portal is used by the majority of iGUIDE users because of its features and lower price. It can be used to create, host and manage property data. Those wishing to share their iGUIDEs publicly and have them indexed by popular search engines including Google must use this portal. Sharing with various parties is also possible via a private or protected link.

2. Enterprise Portal (iguideshield.com, iguideshield.ca)

The iGUIDE Enterprise Portal has enhanced data management and security features in addition to what the Essentials Portal offers at a premium price. When compared to the Essentials Portal, privacy is increased and therefore does not offer search engine indexing.

Selecting your iGUIDE Portal solution

| Feature	Essentials	Enterprise (US/CAN)
Indexable	✓	
Draft services	✓	
SOC II Type II compliance	✓	✓
Secure draft services		✓
Customized hosting and data residency		✓
Invite only		✓
Annual client security evaluation		✓
White glove support		✓

iGUIDE Secure Draft Services

iGUIDE Secure Draft Service is provided from a secure facility in Canada and draft team members are cleared to process protected B level information according to the Canadian government's data classification. The facility where secure drafting services occur is certified by the Canadian government to have FSC (Facility Security Clearance) and has restricted physical access. Personnel are also subject to a DOS (Designated Organization Screening) so they can access protected information, assets and work sites. Secure draft services also possess document safeguarding capability (DSC) which authorizes an organization to store and handle protected or classified information or assets at their business locations.

Customized hosting location and data residency

Data follows a different path depending on the Portal experience selected.
By choosing your Portal experience you're choosing the country the data resides in.

Feature	Essentials	Enterprise (CAN)	Enterprise (US)
Drafted anywhere	✓		
Data resides in US	✓		✓
Drafted in Canada		✓	✓
Data resides in Canada		✓	

Get started with iGUIDE today

From submission to delivery, streamline your workflow and elevate your outcomes with Planitar's comprehensive suite of Portal solutions. Embrace efficiency, accuracy, and innovation with the iGUIDE Portal today.

About us

Founded in 2013, in Kitchener, Ontario, Canada, Planitar Inc. is the maker of iGUIDE, a proprietary camera and software platform for capturing and delivering immersive 3D virtual walkthroughs and extensive property data.

Why iGUIDE

iGUIDE is the most efficient system to map interior spaces and features accurate floor plans, measurements and reliable property square footage. By integrating floor plans and visual data, iGUIDE provides an intuitive and practical way to digitally navigate and explore built environments.
